[redacted] assigned to plan the construction of fuel tank installations in Sassnitz. [redacted] already worked out plans for the storage of 10,000 tons of Diesel oil and 1,000 tons of lubricating grease with a pumping installation. At present, discussions are being held to decide whether the steel tanks should be designed with steel concrete jackets when other materials are less resistant to oil corrosion. *

* Comment. [redacted] there are already two small fuel tank depots in Sassnitz, one of which is located at the Sassnitz harbor and one at the Sassnitz railroad station.
